Gentlemen:

Re: United States Steel Corporation
Gary Works
NPDES Permit No. 0000281

[Redacted]
For samples collected on February 6, 1978, for outfall 034 (3E-17), our analysis indicates a zinc concentration of 0.35 mg/l and a chromium concentration of 1.0 mg/l.

We have investigated these matters and have been unable to establish a definite cause.

Subsequent sampling indicates a zinc concentration of less than 0.05 mg/l and a chromium concentration of less than 0.05 mg/l which are within compliance.

Very truly yours,

JGBehrens
